Bungalow with 2-Car Rear Garage. This design is unique with the garage in the rear. A covered walkway runs from the garage doors to the front entry. The great room, dining room, and kitchen are all vaulted. The kitchen has a corner pantry and centre island. The dining room has double garden doors that lead to a side, partially covered rear deck. The great room has a direct vent gas fireplace. There are 3 bedrooms on the main floor, accompanied by a large laundry room. The master bedroom has a large walk-in closet with shelves, plus a 4-piece ensuite. A 3-piece bathroom is located across from the other 2 bedrooms. The 2-car garage has enough room for a workshop area - lots of space. There are man doors in the front and rear, plus an entry from the garage into the house through the laundry room. The stairs at the front entry lead to the basement, which is undeveloped and ready for your design.
